UTILIZATION OF NATIONAL GUARD DUAL STATUS TECHNICIANS

1. The attacks on the Pentagon and the New York World Trade Center have caused our country to place all military installations on high alert. We have received some inquiries as to the use of National Guard (NG) technicians for security purposes. Commanders and/or supervisors can assign technicians installation security duties via the personnel action of detail. Such action is consistent with management's statutory right to determine internal security practices 5 USC 7106(a)(1) as well as their right to assign work 5 USC 7106(a)(2)(A)(B).
2. An established PD is not required to detail a technician to a group of duties. Technicians may be assigned to an unclassified aggregate of duties. The description of duties and responsibilities required for the detail can be written as simple as needed to accomplish the task. These duties can include the carrying of a weapon or firearm provided the individual is qualified to use the TOE or TA weapon (as per DA PAM 350-38 or AFI 31-207). In addition, carrying a weapon must be consistent with the installation security duties assigned.
3. The OPM and NGB no longer require a SF-50, Notification of Personnel Action, for detail actions. However, if you desire to document the action, the current payroll system will generate a SF-50. The appropriate Nature of Action code is 930. The authority code for Dual Status Technicians is V8K and for Non-Dual Status the code is V8N.
4. Direct questions concerning this TAAI to MAJ Buethe at CAGNET 63412, DSN 466-3412, or commercial (916) 854-3412.
